

Red Hat Enterprise Linux

A Family of Operating Systems

Red Hat is the world's leading supplier of commercial-strength Linux solutions. The Red Hat Enterprise Linux family of products provide the industry's most comprehensive suite of Linux solutions designed expressly for mission-critical enterprise computing and certified by top enterprise software vendors. It delivers the highest levels of reliability and value - coupling the innovation of open source technology and the stability of a true enterprise-class platform. Now you can deploy Linux in the most demanding environments, from the desktop to the data-center.

Red Hat Enterprise Linux products are built around a common core that delivers the features required for commercial deployments. These include:

- Support for a wide range of Independent Software Vendor (ISV) applications, including Oracle, VERITAS, IBM and BEA
- Certification on multiple architectures and leading hardware OEM platforms, including Dell, HP and IBM
- Comprehensive service offerings, up to 24 x 7 with 1 hour response, available from Red Hat and selected ISV/OEM partners
- Excellent performance, scalability and availability, with audited industry benchmarks—including TPC-C, TPC-R, ECperf, NotesBench, SPECjAppServer2001
- Excellent stability with 12-18 month version upgrade cycles and guaranteed five years product support
- A fully homogeneous family of products that enable seamless interoperation of systems from the desktop to the datacenter

Red Hat Enterprise Linux products are delivered on an annual subscription basis with one year of support services and access to Red Hat Enterprise Network Service, ensuring your business IT deployments stay reliable and secure.

Red Hat Enterprise Linux AS

Red Hat Enterprise Linux AS (formerly called Red Hat Linux Advanced Server) is the top-of-the-line Enterprise Linux solution. Supporting the largest commodity-architecture servers and available with the highest levels of support, Red Hat Enterprise Linux AS is the ultimate solution for large departmental and datacenter server deployments.

Red Hat Enterprise Linux ES

Red Hat Enterprise Linux ES is the perfect server operating system solution for the majority of today's business computing needs – suitable for systems ranging from the edge-of-network to medium scale departmental deployments.

Red Hat Enterprise Linux WS

Red Hat Enterprise Linux WS is the desktop/client partner for Red Hat Enterprise Linux AS and Red Hat Enterprise Linux ES. Red Hat Enterprise Linux WS is ideal for client-server deployments, S/W development environments and targeted ISV client applications (such as Electronic Design Automation and Oil/Gas applications).

Red Hat Enterprise Linux Feature Analysis

Feature	Red Hat Enterprise Linux WS	Red Hat Enterprise Linux ES	Red Hat Enterprise Linux AS
Supported by leading ISV applications	Yes	Yes	Yes
Supports systems with >2 CPUs ¹	No	No	Yes
Supports systems with >4GB of main memory	Yes	No	Yes
Supports X86 compatible architecture	Yes	Yes	Yes
Supports Itanium 2 architecture	Yes ²	No	Yes ³
1 year subscription to Red Hat Enterprise Network included	Yes	Yes	Yes
12 x 5 services available from Red Hat	Yes	Yes	Yes
24 x 7 services available from Red Hat	No	No	Yes
Includes network server applications (e.g. dhcp, dns)	No	Yes	Yes
Includes High Availability Clustering	No	No	Yes
Suitable for HPC deployments	Yes	Yes	Yes

¹ A CPU chip containing multiple hyper-threaded processing elements is counted as a single CPU.
² Itanium 2 requires Red Hat Linux Advanced Workstation for the Itanium Processor
³ Itanium 2 requires Red Hat Linux Advanced Server for the Itanium Processor

Managing Red Hat Enterprise Linux with Red Hat Enterprise Network

Red Hat Enterprise Linux systems use bundled and optional Red Hat Enterprise Network features to perform system maintenance and monitoring. There are two primary capabilities:

- Provisioning of all software updates (including security errata) using Red Hat Enterprise Network's Software Delivery Module. This capability is included in the subscription for all Red Hat Enterprise Linux products.
- Comprehensive monitoring of the Red Hat Enterprise Linux operating system and targeted applications (such as Oracle, MySQL and BEA WebLogic) using Red Hat Enterprise Network's Monitoring Module. Available as an upgrade option.

Red Hat Enterprise Linux Training

Red Hat offers the industry's most highly respected Linux training and certification program. The program covers all aspects of the Red Hat Enterprise Linux product family. Enterprise courses include:

- RH133 Red Hat Linux System Administration
- RH253 Red Hat Linux Networking and Security Administration
- RH301 Red Hat Linux Rapid Track Course (for experienced Unix system administrators)
- RH401 Red Hat Enterprise Deployment and Systems Management

Product Details

Red Hat Enterprise Linux products are available in several variants, each providing a different level of service. Prices quoted are for a single system Annual Subscription.

Product	Service Level	Price
Red Hat Enterprise Linux WS	<i>Standard Edition</i> – 1-year Monday-Friday 9-9 USA (9-5 rest of World) with 4-hour response, unlimited incidents & Red Hat Enterprise Network ¹	\$299.00
Red Hat Enterprise Linux ES	<i>Standard Edition</i> – 1-year Monday-Friday 9-9 USA (9-5 rest of World) with 4-hour response, unlimited incidents & Red Hat Enterprise Network ¹	\$799.00
Red Hat Enterprise Linux AS	<i>Standard Edition</i> – 1-year Monday-Friday 9-9 USA (9-5 rest of World) with 4-hour response, unlimited incidents & Red Hat Enterprise Network	\$1,499.00
	<i>Premium Edition</i> – 1-year 24x7 with 1-hour response, unlimited incidents & Red Hat Enterprise Network	\$2,499.00

¹ A downloadable Basic Edition that provides 90 days Installation and Configuration support and a 1-year subscription to Red Hat Enterprise Network is also available at www.redhat.com
