

JBoss Pilot Smart Start

WHAT IS IT?

A comprehensive offering from Red Hat that includes certified software, support, training and consulting. The JBoss Pilot Smart Start delivers a practical way to begin leveraging an open, flexible, and lower cost Java application platform. This is not a disposable proof of concept. The JBoss Smart Start Pilot engagement will result a production-ready application deployed and performance tuned on the JBoss Enterprise Application Platform.

WHAT DOES IT DO?

The JBoss Pilot Smart Start installs and configures the JBoss Enterprise Application Platform, migrates and performance tunes one simple Java EE application, and trains one Java EE architect and one JBoss administrator. It also helps ensure initial success with JBoss Certified Consultants, and future success with JBoss training and support.

WHY SHOULD I CARE?

JBoss Enterprise Middleware is easy to use, easy to consume, and delivers significantly lower total cost of ownership. JBoss Pilot Smart Start greatly reduces risk and helps ensure success with software and expert professional services delivered as a fixed-term, fixed deliverable, and discounted bundle. It also provides a solid proof point to validate JBoss Enterprise Application Platform as the platform of choice for your mission critical Java EE applications.

DELIVERABLES

Subscription (Software + Support + Patches and Updates)

- JBoss Enterprise Application Platform
- Subscription - 1 Year
- 8 CPUs
- Standard Support (4 Business Hour SLA)
- JBoss Operations Network
- JBoss Operations Network Monitoring Upgrade

Consulting

- Install and configure JBoss Enterprise Application Platform
- Install and configure JBoss Operations Network w/ Monitoring upgrade
- Migrate and performance tune one simple JavaEE application

Training

- JBoss for Advanced JavaEE Developers One Student; 4 days
- JBoss for Administrators - One Student; 4 days
- Best Practices & Methodologies Knowledge Transfer

SCOPE

The JBoss Pilot Smart Start is targeted at three weeks. Migration of more complex applications may require addition time and may exceed the scope of the JBoss Pilot Smart Start. A custom statement of work will be proposed for these more complex engagements. Ideal applications for the JBoss Pilot Smart Start will closely comply with the Java EE specification and the component specifications which comprise Java EE (JSP/Servlet, EJB, JMS).

REQUIREMENTS

The customer will need to provide a developer or architect familiar with the application code to work with the JBoss Certified Consultant, or be immediately available for consultation during the migration process. All source code should be readily available and documented. To be eligible for the bundle discount, the bundle may not be broken.
