

CONSULTING UNITS FROM RED HAT CONSULTING

PREPAID CONSULTING UNITS

Consulting Units offer you the flexibility to purchase consulting services from Red Hat in advance, and determine your precise consulting needs later. Buy Consulting Units now and apply them to any Red Hat Consulting purchase within 12 months of purchase.

If you have unallocated end-of-year budget, Consulting Units are a great way to invest in your technology infrastructure needs without committing to a specific consulting topic upfront.

Purchase Information: Each unit costs \$100 (MSRP) and a minimum purchase of 100 units is required per purchase. A typical one week engagement requires 100 units but may vary based on your specific requirements. Contact your sales rep, email sales@redhat.com or call 888 RED HAT1 to purchase.

CONSULTING UNITS REDEMPTION

Redeem Consulting Units for any Red Hat Consulting service including: Assessments, Quickstarts, Implementations, Health Checks, and Workshops. See a full list of services at www.redhat.com/consulting. Sample offerings include:

Assessments

Look before you leap. Assessments are a first step towards a migration or other larger-scale implementation project. Learn first-hand from an expert and walk through project scoping details, work prioritization, and best practices. Before migrating to Red Hat Enterprise Linux, for example, these solutions will help you calculate ROI and TCO implications and estimate project timelines. Typically two-week engagements.

Quickstarts

Quickstarts are fast installations of new Red Hat technology solutions, aided and optimized by a consultant to ensure your organization gets it right from the start, increasing time to value and decreasing your time to production--all while mitigating deployment and migration risks. Typically 1-2 week engagements.

Implementations

Implementations consist of comprehensive installation, configuration, and deployment of new technologies. A Red Hat consultant will ensure you get it right from the start, allowing the fastest possible time to value and time to production while minimizing migration and deployment risks. And, your internal team will benefit from maximum knowledge transfer and Q&A with a Red Hat expert. Typically 2-3 week engagements.

Health Checks

Health Checks are a great opportunity to ensure your organization is getting the most value from your JBoss deployments. In a 1-2 week consulting engagement, a Health Check includes a thorough review of your platform, validating the installation and configuration of your JBoss Enterprise Application Platform against a comprehensive checklist.

Workshops

Workshops focus on maximum knowledge transfer to your internal teams and can be customized to your specific topic.
