

RED HAT DEVELOPER SUBSCRIPTIONS

WHAT IS IT?

Red Hat® Developer Subscriptions deliver pre-configured development tools and developer access to JBoss Enterprise Middleware products and Red Hat Enterprise Linux® Advanced Platform. Red Hat Developer subscriptions also include developer support for JBoss Enterprise Middleware products, frameworks, and Red Hat Enterprise Linux.

WHAT DOES IT DO?

Red Hat Developer Subscriptions help developers complete application development projects faster and more efficiently, speeding time-to-deployment and maximizing developer productivity. Developers can contact Red Hat directly when they have questions about developing with JBoss and Red Hat solutions.

WHY SHOULD I CARE?

Now you can develop on the same JBoss Enterprise Middleware and Red Hat solutions that you deploy on, with a bench of Java and Red Hat Enterprise Linux experts to ensure success. Pre-configured tools increase efficiency and productivity, and there is no limit to the number of support incidents you can submit. Leveraging the flexibility and control of open source has never been easier or more cost-effective.

JBoss DEVELOPER STUDIO PORTFOLIO EDITION

JBoss Developer Studio includes a set of Eclipse-based development tools that are pre-configured for JBoss Enterprise Middleware Platforms, as well as development tools for Red Hat Enterprise Linux. Developers are not required to use JBoss Developer Studio to develop

on JBoss Enterprise Middleware, but these integrated and tested tools offer significant time savings and value, making developers more productive and speeding time-to-deployment.

In addition to development tools, JBoss Developer Studio Portfolio Edition also includes all JBoss Middleware Platforms, including JBoss Enterprise Application Platform, JBoss SOA Platform, JBoss Enterprise Portal Platform, JBoss Enterprise Data Services Platform, Open JDK, and entitlements to Red Hat Enterprise Linux. The entitlements included are for one developer with up to four CPUs for development purposes.

RED HAT DEVELOPER SUPPORT

Red Hat Developer Support includes expert advice spanning architecture, design, configuration, and tuning recommendations. JBoss Developer Support is available for Red Hat Enterprise Linux Advanced Platform, JBoss Enterprise Middleware Platforms, OpenJDK, and JBoss Operation Network (JBoss ON). There are four different types of developer support offerings. Enterprises can choose the appropriate options based on the JBoss platform they are using and their required response time.

RED HAT APPLICATION DEVELOPER PROFESSIONAL

Red Hat Application Developer Professional is designed for corporate developers and individuals that are deploying their application(s) on the JBoss Enterprise Application Platform family of products. JBoss Application Developer Professional includes developer support for JBoss Enterprise Application Platform, JBoss Developer Studio, JBoss ON, OpenJDK, and Red Hat Enterprise Linux Advanced Platform.

Red Hat Application Developer Professional offers one contact with two-business-day service level agreement (SLA) and unlimited incidents, and includes 10 development entitlements to JBoss Developer Studio - Portfolio Edition which is a package of all of JBoss Enterprise Middleware, frameworks and Tools. It also includes 10 entitlements to Red Hat Enterprise Linux Advanced Platform, and Red Hat Enterprise Linux Client. The software entitlements included are for development purposes only.

RED HAT APPLICATION DEVELOPER ENTERPRISE

Red Hat Application Developer Enterprise is designed for corporate developers and independent software vendors (ISVs) targeting their application deployment for the JBoss Enterprise Application Platform family of products who need faster response time on support incidents. This subscription includes developer support for JBoss Enterprise Application Platform, JBoss Developer Studio, JBoss ON, OpenJDK, and Red Hat Enterprise Linux Advanced Platform.

Red Hat Application Developer Enterprise offers one support contact with a four business-hour SLA and unlimited incidents, and includes 10 development entitlements to JBoss Developer Studio - Portfolio Edition which is a package of all of JBoss Enterprise Middleware, frameworks and Tools. It also includes 10 entitlements to Red Hat Enterprise Linux Advanced Platform, and Red Hat Enterprise Linux Client. The software entitlements included are for development purposes only.

RED HAT PORTFOLIO DEVELOPER PROFESSIONAL

Red Hat Portfolio Developer Professional is designed for corporate developers and individuals that are developing enterprise applications or integration services and targeting deployment to any of the JBoss Middleware Platforms. It includes developer support for all JBoss Middleware Platforms including JBoss Enterprise Application Platform, JBoss SOA Platform, JBoss Enterprise Portal Platform, JBoss Enterprise Data Services Platform, JBoss Developer Studio, JBoss ON, OpenJDK, and Red Hat Enterprise Linux Advanced Platform.

Red Hat Portfolio Developer Professional offers one contact with a two-business-day SLA and unlimited incidents. It also includes 10 development entitlements to JBoss Developer Studio - Portfolio Edition which is a package of all of JBoss Enterprise Middleware, frameworks and Tools. It also includes 10 entitlements to Red Hat Enterprise Linux Advanced Platform, and Red Hat Enterprise Linux Client. The software entitlements included are for development purposes only.

RED HAT PORTFOLIO DEVELOPER ENTERPRISE

Red Hat Portfolio Developer Enterprise is designed for corporate developers and independent software vendors (ISVs) that are developing enterprise applications or integration services and targeting deployment to any of the JBoss Middleware Platforms and need faster response on support incidents. It includes developer support for all JBoss Middleware Platforms including JBoss Enterprise Application Platform, JBoss SOA Platform, JBoss Enterprise Portal Platform, JBoss Enterprise Data Services Platform, JBoss Developer Studio, JBoss ON, OpenJDK, and Red Hat Enterprise Linux Advanced Platform.

Red Hat Portfolio Developer Enterprise offers one contact with four-business-hour SLA and unlimited incidents, 10 development entitlements to JBoss Developer Studio – Portfolio Edition which is a package of all of JBoss Enterprise Middleware, frameworks and Tools. It also includes 10 entitlements to Red Hat Enterprise Linux Advanced Platform, and Red Hat Enterprise Linux Client. The software entitlements included are for development purposes only.

TAKE CONTROL

Because Red Hat and JBoss solutions are open source, developers have direct access to the source code, and can see exactly what’s occurring in the software they’re developing. Being able to determine exactly how services are provided is extremely helpful, and allows developers to take advantage of advanced features, avoid performance bottlenecks, and bypass the costly trial-and-error guesswork that hampers efficient application development. The open source development process speeds time-to-market and lets your engineering and IT staff work more efficiently.
