

RED HAT DEVELOPER SUBSCRIPTIONS

WHAT ARE THEY?

Red Hat Developer Subscriptions deliver pre-configured development tools, as well as developer access to, and developer support for all JBoss Enterprise Middleware, Red Hat Enterprise Linux and all other Red Hat products.

WHAT DO THEY DO?

Red Hat Developer Subscriptions help developers complete application development projects faster and more efficiently, speeding time to deployment and maximizing developer productivity.

WHY SHOULD I CARE?

Now you can develop on the same JBoss Enterprise Middleware and Red Hat products that you will deploy on, with a bench of Java and Red Hat Enterprise Linux experts to ensure your success, and pre-configured tools that increase efficiency and productivity. With no limit to the number of incidents you can submit, leveraging the flexibility and control of open source has never been easier or more cost effective.

JBOSS DEVELOPER STUDIO

JBoss Developer Studio includes a set of eclipse-based development tools that are pre-configured for JBoss Enterprise Middleware Platforms as well as development tools for Red Hat Enterprise Linux. Developers are not required to use JBoss Developer Studio to develop on JBoss Enterprise Middleware. But, these pre-configured tools offer significant time-savings and value, making them more productive and speeding time to deployment. In addition to development tools JBoss Developer Studio also includes one entitlement

to Red Hat Enterprise Linux and one entitlement to JBoss Enterprise Application Platform (up to 4 CPUs) for development purposes.

RED HAT DEVELOPER SUPPORT

Developer Support includes expert advice spanning architecture, design, configuration, optimization, and tuning recommendations. Developer support is available for Red Hat Enterprise Linux, JBoss Enterprise Middleware and other Red Hat products. There are two developer support offerings:

- Red Hat Developer Professional is designed for corporate developers and individuals. It offers one contact a two business day service level agreement and unlimited incidents. It also includes one entitlement to each of the following: JBoss Developer Studio, all JBoss Enterprise Platforms and Frameworks (up to 4 CPUs each), Red Hat Enterprise Linux Advanced Platform, and all other Red Hat software products for development purposes.
- Red Hat Developer Enterprise is designed for Independent Software Vendors. It offers two contacts a four business hour service level agreement and unlimited incidents. It also includes two entitlements to JBoss Developer Studio, one entitlement to all JBoss Enterprise Platforms and Frameworks (up to 32 CPUs each), eight entitlements to Red Hat Enterprise Linux Advanced Platform, and eight entitlements each to all other Red Hat software products for development purposes.

TAKE CONTROL

Having access to the source code means that you have the ability to see exactly what's occurring in the software you're developing on. Being able to see exactly how services are provided is extremely helpful for developers to take advantage of advanced features, help avoid performance bottlenecks, and avoid the costly trial-and-error guesswork that hampers efficient application development and slows time to market.
