

EXO FOR JBOSS ENTERPRISE PORTAL PLATFORM

EXTEND YOUR PORTAL

EXO AND RED HAT: PARTNERED SOLUTIONS FOR THE INFORMATION WORKPLACE

JBoss Enterprise Portal Platform: Based on community partnership

JBoss Enterprise Portal Platform enables organizations to easily implement dynamic web presences. Unlike portals of the past, JBoss Enterprise Portal Platform enables quick time-to-value, an easily extendable architecture, and has minimal impact upon existing skills and technology investments. Based on the GateIn community portal project, JBoss Enterprise Portal Platform 5.1 is the technical foundation for the Red Hat and eXo partnership.

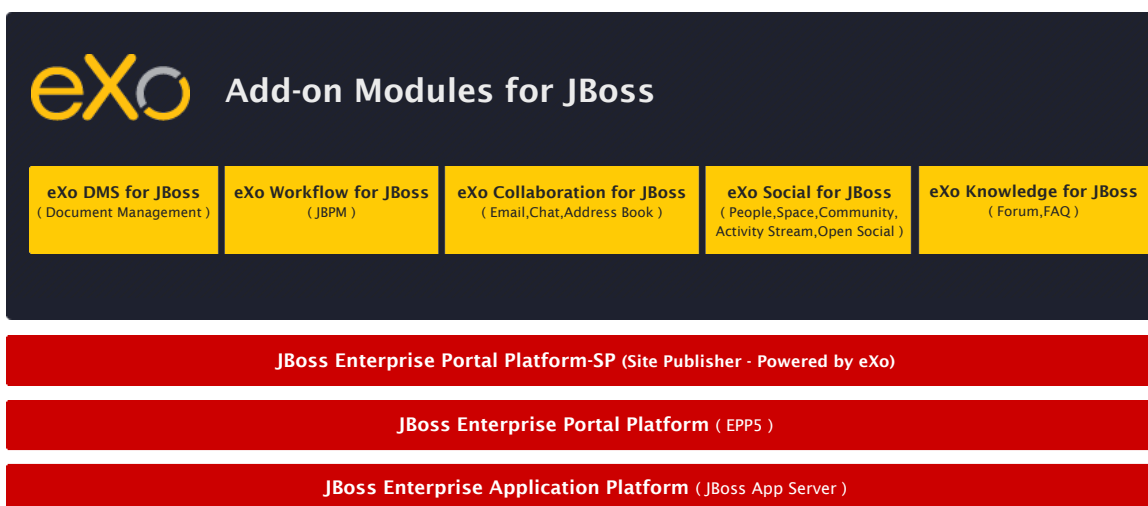

JBoss Enterprise Portal Platform – Site Publisher: Powered by eXo

Red Hat also offers a new add on module to the JBoss Enterprise Portal Platform, Enterprise Portal Platform Site Publisher (powered by eXo). Leveraging the eXo WCM project, Site Publisher offers a new set of web content management functionality, enabling line of business users to easily create and manage websites and web content within the context of the Portal.

eXo Add-On Modules for JBoss Enterprise Portal Platform Site Publisher

JBoss Enterprise Portal Platform Site Publisher offers a snappable architecture that supports a wide range of extensions. eXo offers certified extensions for Site Publisher to provide new functionality for JBoss Enterprise Portal Platform users: eXo Collaboration, eXo Document Management, eXo Social, eXo Knowledge, and eXo Workflow.

EXO MODULES FOR JBOSS ENTERPRISE PORTAL PLATFORM SITE PUBLISHER

eXo DMS for JBoss (Document Management)

Manage your organization's unstructured information content, with all its diversity of format and location. Gather information with customized forms or aggregated RSS feeds. Tag, version and index documents, then navigate through your documents via thumbnails and cover-flows.

eXo Collaboration for JBoss

Include intuitive and powerful Mail, Chat, Calendar and Address Book functionality as a seamless extension to your portal-based application.

eXo Social for JBoss

By turning your company directory into an enterprise social network, you give your end users more communication, connection, and collaboration options to make them more productive. With support for OpenSocial, eXo Social provides a framework for developers to build gadgets that can display and mashup your social network user and activity information.

eXo Knowledge for JBoss

Enhance your company's internal productivity and creativity while building a valuable knowledge center for your clients. Our knowledge collaboration tools will help you to grow a community of users and experts around your business.

EPP Site Publisher: Powered by eXo WCM

Publish your documents in a search-optimized website that you can fully customize to your own needs. Use the website templates, fast edition features, or CSS and Javascript support to efficiently build your website. Versioning and roll-back of content helps you keep track of content edition.
