

# RED HAT TRAINING AND CERTIFICATION

## SYSTEM ADMINISTRATION TRAINING PATHS

Red Hat Training has offered Linux system administration courses and certifications for over a decade. With the release of Red Hat® Enterprise Linux® 6, we will continue to offer a job-relevant, hands-on training curriculum; a robust, performance-based certification program; and a consistent training experience worldwide. That means listening to our customers, listening to the market, and taking into account developments in the job roles and backgrounds of those administering and working with Red Hat Enterprise Linux today.

### PRESCRIPTIVE TRAINING PATHS FOR EXPANDED IT AUDIENCES

Whether your team requires an accelerated transition from Solaris or to get experienced Windows administrators trained with the corresponding Linux skills, Red Hat offers multiple training paths for wider variance of student skill sets. Unlike most vendors, we orient our training and certifications around real world job roles and tasks. This ensures Red Hat training has the right training path for your and your company's needs.

### INDUSTRY-LEADING, ROLE-BASED TRAINING

Red Hat uses the best-of-breed contemporary teaching approach to ensure maximum skills transfer and retention. This includes courses that actively engage students in task-focused activities, lab-based knowledge checks, and facilitative discussions. In addition, our course materials provide job aids, exercise reinforcement, and task-based reference material. Industry leading, role-based training can increase a company's return on investment and an IT professional's productivity.

### CERTIFICATION PROGRAMS ALIGN WITH TODAY'S MARKETPLACE

Red Hat is pleased to announce an addition to its lineup of performance-based certifications—Red Hat Certified System Administrator (RHCSA™). The new RHCSA credential aligns with the skills required for today's enterprise system administrators. As with all Red Hat certification exams, the RHCSA exam continues the practice of benchmarking the skills of IT professionals through hands-on assessments.

### RED HAT CERTIFICATIONS

Red Hat's performance-based certifications are among the most highly regarded in the IT industry. It's success stems from a solid track record of benchmarking and hands-on skills assessment.

redhat  
CERTIFIED  
SYSTEM  
ADMINISTRATOR

A Red Hat Certified System Administrator (RHCSA) certification is earned by passing a hands-on, lab-based exam that covers the core system administration skills required in Red Hat Enterprise Linux environments.

redhat  
CERTIFIED  
ENGINEER

Red Hat Certified Engineer (RHCE) is earned by a Red Hat Certified System Administrator (RHCSA) who has demonstrated the knowledge, skill and ability required of a senior system administrator responsible for Red Hat Enterprise Linux systems.

Learn more about the complete portfolio of Red Hat certifications at [redhat.com/certification](http://redhat.com/certification).

### SYSTEM ADMINISTRATION TRAINING COURSES

**Red Hat System Administration I (RH124)** is designed for IT professionals who are new to Linux and require core Red Hat Enterprise Linux skills. Focusing on administration tasks that will be encountered in the workplace, students will learn to perform installations, establish network connectivity, manage physical storage, and perform basic security administration. This course builds on students' existing technical knowledge by focusing on GUI-based tools, while still covering key command line concepts.

→ Learn more at [redhat.com/explore/rh124](http://redhat.com/explore/rh124).

**Red Hat System Administration II with RHCSA Exam (RH135)** is a followup to System Administration I and builds on the foundation of command line skills covered in the first course. At the completion of this course designed for IT professionals working to become full-time enterprise Linux system administrators, students will be able to administer and troubleshoot file systems and partitioning, logical volume management, access control, and package management. Students who complete Red Hat System Administration I & II will be fully prepared to take the Red Hat Certified System Administration (RHCSA) exam. This course includes the RHCSA exam.

→ Learn more at [redhat.com/explore/rh135](http://redhat.com/explore/rh135).

## TRAINING PATHS

**RHCSA Rapid Track Course with Exam (RH200)** is designed for experienced Linux system administrators who already have solid command line skills and know how to access man pages for help. Students will learn to properly manage a Linux server, including installation and configuration of local components and services, as well as connections to existing network services. At the completion of the course, students will be adequately prepared to take the Red Hat Certified System Administration (RHCSA) exam. This course includes the RHCSA exam.

→ Learn more at [redhat.com/explore/rh200](https://redhat.com/explore/rh200).

**Red Hat System Administration III with RHCSA and RHCE Exams (RH255)** is designed for experienced Linux administrators with RHCT/RHCSA or equivalent skills who require networking and security administration skills. This course focuses on automation skills to securely configure, deploy, and manage network services, including DNS, Apache, SMTP, and network file sharing. In addition, there is emphasis on security, including monitoring, packet filtering, access controls, and SELinux. This course includes the RHCSA and RHCE exams.

→ Learn more at [redhat.com/explore/rh255](https://redhat.com/explore/rh255).

### **Red Hat Enterprise Linux for Solaris Administrators**

**(RH290)** is designed as a preface to the RHCE Rapid Track course. It quickly and efficiently covers many of the hands-on, practical skills needed when transitioning from Solaris to Red Hat Enterprise Linux. It focuses on the differences between the two operating systems, covering Red Hat Enterprise Linux equivalents to Solaris-specific technologies, like applying software patches, automated deployment with Jumpstart, and advanced filesystem features. In addition, the course demonstrates how to use RPM, yum, Red Hat Network (RHN), and Kickstart to manage your environment.

→ Learn more at [redhat.com/explore/rh290](https://redhat.com/explore/rh290).

### **RHCE Rapid Track Course with RHCSA and RHCE Exams**

**(RH300)** is designed for senior Linux system administrators who want to validate their competencies by earning the RHCSA and RHCE credentials. This is a fast-paced review course that combines the RHCSA Fast Track Course (RH199) and System Administration III (RH254) courses, normally eight days of training, into a single four-day course. By the end of this course, senior Linux administrator students will be exposed to all the intermediate and advanced competencies tested by the RHCSA and RHCE exams, which are included with this course.

→ Learn more at [redhat.com/explore/rh300](https://redhat.com/explore/rh300).

## **WAYS TO TRAIN**

Whether you need to train a team of IT professionals, or just yourself, Red Hat offers a variety of learning styles, delivery methods, certifications, savings programs, and customized solutions to maximize return on your Red Hat Enterprise investment.

### **Classroom training**

Red Hat offers a robust six-month schedule of classroom training in more than 40 training locations across North America. That convenience, combined with our high-quality classroom experience and instructor expertise, helps ensure companies and individuals will achieve their training goals.

→ Learn more at [redhat.com/explore/classroom\\_training](https://redhat.com/explore/classroom_training).

### **Remote classroom training**

Red Hat remote classroom offers high-definition classroom training experience—without the travel. Each remote Red Hat-authorized training classroom incorporates continuous two-way video, audio enhanced class participation, and facilitated question-and-answer feedback with the instructor.

→ Learn more at [redhat.com/explore/remote\\_classroom](https://redhat.com/explore/remote_classroom).

### **Virtual training**

The flexibility of Red Hat virtual training courses allows IT professionals and companies alike to experience the same industry-leading classroom training while maintaining a partial work schedule and achieving cost savings objectives. This is live, instructor-led training that can be attended from the convenience of an office or home.

→ Learn more at [redhat.com/explore/virtual\\_training](https://redhat.com/explore/virtual_training).

### **Onsite training**

Training teams together is a proven way for IT staff to maximize the performance, savings, and management of Red Hat Enterprise technologies. Available for the entire Red Hat training portfolio, onsite training also provides the option of customizing the course content to meet specific training requirements.

→ Learn more at [redhat.com/explore/onsite\\_training](https://redhat.com/explore/onsite_training).

## **LOCK IN THE SAVINGS**

### **Skills bundles**

You can bundle multiple classes to quickly acquire in-depth knowledge, or you can just bundle an expertise exam with the corresponding course. Whatever your needs are, creating a customized bundle is a cost-effective solution for IT professionals.

→ Learn more at [redhat.com/explore/skills\\_bundle](https://redhat.com/explore/skills_bundle).

### Multi-Student discount

Training together is a proven way for you or your IT staff to maximize performance and savings. Qualify for volume savings when enrolling up to five students from the same company in the same open enrollment class.

→ Learn more at [redhat.com/explore/multi\\_student\\_discount](http://redhat.com/explore/multi_student_discount).

### Training units

Red Hat Training Units (TUs) offer your organization a simple way to purchase training while locking in savings up front. TUs are pre-paid credits that can be redeemed for all courses and methods of training, including onsite. The more you purchase, the greater the discount. They provide your company the flexibility, versatility, and savings options to keep your IT organization running at optimal performance.

- Easy to purchase with subscriptions and individually
- Simple to administer, decreasing the need for expense reimbursement
- Eliminates the need to purchase training ad hoc
- Can be used for up to 12 months after purchase
- Can be redeemed for any Red Hat training course, exam, or training method
- Use unallocated budget effectively

→ Learn more at [redhat.com/explore/training\\_units](http://redhat.com/explore/training_units).

### READY TO TRAIN?

#### Contact a training specialist

Red Hat training is a critical strategy that helps companies realize the full potential of their IT teams and Red Hat enterprise technology. Contact a member of our sales team or a Red Hat training specialist for assistance designing a training path that is right for you needs.

#### Find information online

Check out [redhat.com/training](http://redhat.com/training) to explore the entire Red Hat portfolio of training courses and certifications. There you can download a training catalog, course datasheet, read a whitepaper, watch a taste of training video and more.
