

RED HAT CONSULTING

Migrations and modernization

DATASHEET

RED HAT CONSULTING HELPS YOU REALIZE THE BENEFITS OF MODERNIZATION FASTER AND EASIER

Get reliability and performance at a lower cost. Reduce IT costs and make your infrastructure more scalable and agile.

Run the workloads that drive your business. Quickly and smoothly update older systems and applications to better meet your organization's needs.

Increase agility to meet business needs. Get faster time to production and maximum knowledge transfer with little disruption to your business and operations.

MAXIMIZE EFFICIENCY. MODERNIZE WITH OPEN SOURCE.

The open source model delivers scalable and flexible solutions to IT enterprises. Meet customers' needs faster and with greater precision when you aren't limited by costly proprietary technology. Modernizing applications and workloads using open source platforms offers lower complexity and a lower total cost of ownership.

Migrating systems and applications requires the right partner to ensure your migration is secure and efficient. Many of the world's leading companies use Red Hat® Consulting as that trusted partner to help them modernize using open source.

TRUSTED PARTNER, PROVEN MIGRATION SERVICES

Red Hat Consulting provides the subject matter expertise and years of process experience necessary to help you realize the value of migration sooner. By identifying issues, uncovering risks, and plotting an efficient and effective roadmap to navigate the migration process, Red Hat Consulting can help make your transition to the modern enterprise platform as smooth as possible. Our engagement model focuses on building a streamlined migration strategy based on your unique requirements, guiding you through the migration process and providing the insights and processes for success.

If you've decided to migrate to modern open source technology, consider the benefits of having Red Hat Consulting on your side.

STRAIGHT FROM THE SOURCE

Red Hat Consulting teams communicate directly with Red Hat product development organizations, including Red Hat Enterprise Linux®, Red Hat JBoss® Middleware, and more. Many of our consultants are also active contributors to the upstream open source communities for Red Hat and JBoss technologies.

DIVERSE TECHNICAL EXPERIENCE

With in-depth expertise in both open source and proprietary systems and application platforms in the market, Red Hat Consulting provides clients with a more complete view of their enterprises. Our guidance is based on a holistic understanding of building enterprise systems, not just our own products.

MENTOR-BASED APPROACH

Red Hat Consulting's mentor-based approach will provide the right knowledge transfer to jump start a client's move to Red Hat in a safe and efficient manner. As open source leaders, Red Hat believes that knowledge must be just as open as the source code.

“The standards that Sprint has created with Red Hat Consulting have provided our applications with the fundamental enterprise architectural framework that will allow them to have more flexibility and less dependency on expensive, closed-source technologies in the future.

JAMIE WILLIAMS, DIRECTOR OF IT
MIDDLEWARE, SPRINT

EXPERT-GUIDED PLATFORM MIGRATION TO RED HAT ENTERPRISE LINUX

Red Hat Enterprise Linux is the world's leading open source platform. Workloads running on Red Hat Enterprise Linux give you the stability, scalability, flexibility, and performance you need to move your business forward and take advantage of emerging virtualization and cloud opportunities. Partner with Red Hat Consulting to move your current workloads to open source technologies.

Our consultants guide every step of your migration process, combining our experience with the unique requirements of your environment. Whether you're reducing your hardware footprint, moving to newer, more powerful architectures, or just shifting your current workloads to Red Hat Enterprise Linux, we will define a streamlined migration strategy that encompasses your entire infrastructure and uses proven methods to address your specific needs.

Red Hat Consulting helps you:

- Map your existing environment to a functionally equivalent or improved Red Hat Enterprise Linux infrastructure.
- Create a standard operating environment on which to base your migration and maximize your efficiency.
- Analyze the portability of your existing business applications.
- Examine the risks associated with various migration scenarios and create a holistic risk-mitigation plan.
- Develop a comprehensive migration roadmap tailored to your specific environment.
- Understand the estimated costs and benefits involved with your migration.
- Lead your migration and understand best practices and processes for after the migration.

MIGRATE YOUR APPLICATIONS AND WORKLOADS TO RED HAT ENTERPRISE LINUX AND RED HAT JBOSS MIDDLEWARE

Whether you're migrating commercial or custom applications to Red Hat Enterprise Linux, Java™-based applications from WebLogic or WebSphere to Red Hat JBoss Middleware, or legacy mainframe-based applications to modern Java platforms, modernizing your infrastructure gives you the flexibility to customize your application workloads according to your goals and improves the performance and productivity of your developers.

Application and workload migration starts with a comprehensive migration plan in place to take better advantage of emerging technologies and architectures. Red Hat Consulting implements a well-executed migration that keeps day-to-day operations running smoothly while managing risks and costs and allowing for more strategic planning and investing.

Transitioning to Red Hat Enterprise Linux and Red Hat JBoss Middleware can be time-consuming, high-risk endeavors for IT teams not well-versed in the migration process. The expert team at Red Hat Consulting:

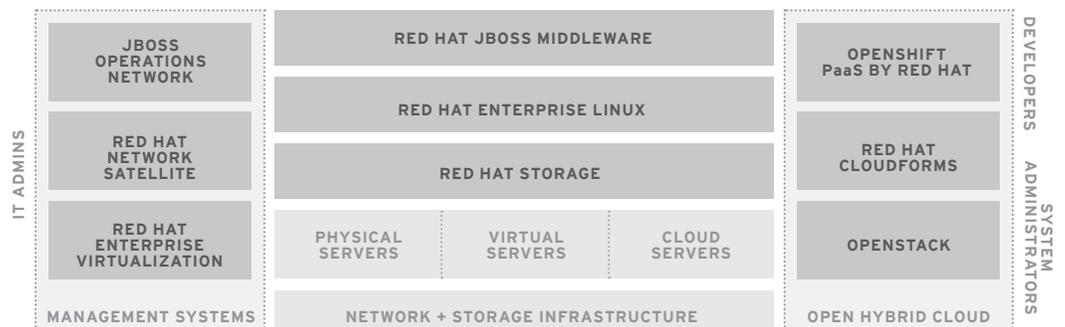

- Examines your existing systems or applications to determine the equivalent capabilities in Red Hat's platform and middleware ecosystems.
- Examines proprietary features and native capabilities to determine the equivalent capabilities in Red Hat and JBoss technologies.
- Measures your organization's readiness and overall migration and modernization risk.
- Develops and implements a strategic migration plan that includes a detailed roadmap, cost estimates, and support strategies.
- Develops and delivers formalized documentation and training.

ABOUT RED HAT

Red Hat is the world's leading provider of open source solutions, using a community-powered approach to provide reliable and high-performing cloud, virtualization, storage, Linux, and middleware technologies. Red Hat also offers award-winning support, training, and consulting services. Red Hat is an S&P company with more than 70 offices spanning the globe, empowering its customers' businesses.
