

CONSULTING UNITS FROM RED HAT CONSULTING

PREPAID CONSULTING UNITS

Consulting Units offer you the flexibility to purchase consulting services from Red Hat in advance and determine your precise consulting needs later. Buy Consulting Units now and apply them to any Red Hat Consulting purchase within 12 months of purchase.

If you have budget that has not yet been allocated and are not completely sure how to make best use of it, Consulting Units are a great way to invest in your technology infrastructure needs without committing to a specific consulting topic upfront.

Purchase Information: Red Hat Consulting Units are credits that you can purchase in various quantities. The value of a Consulting Unit and minimum purchase requirements are country and currency specific. For further information or purchasing Consulting Units, please contact a Red Hat Sales Representative by emailing sales@redhat.com, or call 1-888-REDHAT1.

CONSULTING UNITS REDEMPTION

Redeem Consulting Units for any Red Hat Consulting service including - but not limited to: Implementations, Health Checks, Assessments and Pathways. See full list of services at www.redhat.com/consulting. Sample offerings include:

PRODUCT SERVICES

Red Hat Product Services are short-term consulting engagements that help your organisation to realise the performance, scalability and security benefits of deploying Red Hat infrastructure and JBoss Middleware products. Each engagement is designed to accelerate deployments of Red Hat technologies.

IMPLEMENTATIONS

Implementation services provide a standardised installation of our Red Hat products, making sure it is configured in a simple, stable, secure and scalable way. Proven methods will accelerate time-to-value, reduce risk and refocus IT resources on mission-critical projects and innovation.

HEALTHCHECKS

Healthchecks are a great opportunity to ensure your organisation is getting the most value from your product deployments. During a Healthcheck, our consultants validate your Red Hat or JBoss product installation, configuration and utilisation. They conduct a performance review and provide recommendations on opportunities for operational improvements. This service ensures that your Red Hat or JBoss product is operating at maximum security and efficiency.

DEDICATED RESOURCES

On-site dedicated resources enable you to refocus in-house resources and accelerate project completion. You can purchase Consulting Units in advance and then apply them to on-site dedicated resources working with your internal team to complement any Red Hat service or solution.

PATHWAY SERVICES

Red Hat Consulting offers professional Pathway Services to help organisations solve strategic technology challenges, maximise infrastructure efficiencies, and deliver greater value to your business. Each Pathway begins with an assessment of your business goals and your maturity of your IT infrastructure. It then explores open standards and concepts, and recommendations to achieve your objectives.

ABOUT RED HAT CONSULTING

Using Red Hat Consulting is a wise investment for organizations looking for trusted advisers with expertise in enterprise open source.

Red Hat Consulting has a proven track record helping customers understand and develop solutions that tackle real pain points effectively, both in terms of functionality and cost.
