

RED HAT CLOUD PATHWAY

ESTABLISHING THE FOUNDATION FOR YOUR PRESENT AND FUTURE CLOUD INITIATIVES

Despite the unmistakable benefits of cloud computing, most organizations are still determining whether and how to apply it to their businesses. After all, cloud computing is transforming the fundamental way we do business. And with transformation comes uncertainty.

The best way to overcome uncertainty and embark on your cloud strategy is to establish a solid foundation. This entails a deep dive understanding of your environment and preparing your infrastructure to ensure it is optimized for cloud computing.

RED HAT SERVICES CLOUD PATHWAY

The Red Hat Cloud Pathway is a series of tailored consulting engagements designed to help organizations move into a future of cloud computing and business agility. This strategic service combines open source expertise, product recommendations, and best practices to:

- Explore cloud viability
- Develop a strategic road map for cloud adoption
- Establish a cloud platform to serve as the foundation for your present and future cloud computing initiatives

EMBARKING ON YOUR PATH

Each Pathway begins with an assessment of your organization's business goals, the maturity of your IT infrastructure, an exploration of open standards, concepts and alternatives, and strategic recommendations for your organization to achieve its business goals. During this phase, a team of technical and open source business experts will work with you to:

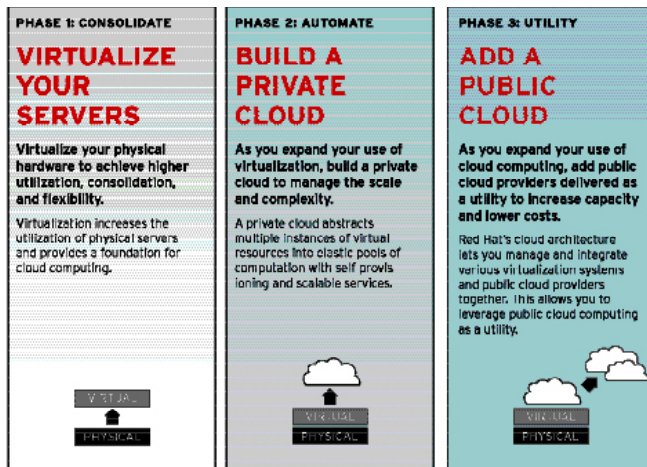

- Examine and catalog existing software and hardware infrastructure as well as analyze the possibilities and limitations for using virtualization technology to consolidate servers.
- Assess IT maturity from multiple dimensions to understand the gap between current maturity and that required for specific cloud deployment models.

- Present a preliminary architecture in the support of cloud deployment of middleware, applications, services, and business processes.
- Develop a high-level road map for cloud deployment
- Upon completion of this phase, Red Hat will work closely with you to map out a comprehensive deployment strategy.

DELIVERABLES

- Server consolidation and virtualization analysis
- TCO model for moving to virtualized environment
- Service integration maturity assessment report
- Preliminary cloud architecture
- Cloud adoption road map

Red Hat Cloud provides everything you need to help you plan, build, and manage a private cloud. Through our comprehensive set of integrated products, reference architectures, consulting services, training, exceptional customer support, and the richest partner ecosystem anywhere, Red Hat makes cloud computing easy and safe. What's more, Red Hat provides the performance, choice, flexibility, and speed to market that can only come from the open source leader, backed by the experience and technology of more than a decade of powering the mission-critical infrastructure and applications of the world's most demanding organizations.

ABOUT RED HAT CONSULTING

Red Hat Consulting has a proven track record helping customers do more with less by fully utilizing the value of their subscriptions. Our global team of consultants is comprised of architects and engineers who are Red Hat product experts. Cumulatively, they have decades of experience integrating Red Hat Enterprise Linux into unique and varying environments – always ensuring maximum performance and value.

REQUIREMENTS

To ensure a smooth delivery of service, the following people from your organization should be available to assist the consultant during the engagement:

- **Sponsor:** This person provides guidance and an escalation point, should one be necessary. The sponsor also serves as the ultimate sign-off authority for the consulting engagement.
- **Project manager:** This person manages the day-to-day activities related to this engagement and ensures the timely delivery of information required for the project.
- **IT and other staff:** These people are your IT and other professionals who provide Red Hat with the relevant and necessary information about your infrastructure.
