

INFRASTRUCTURE MIGRATION

Begin your move toward open hybrid cloud. Escape legacy virtualization limitations and vendor lock-in with Red Hat® open source solutions.

Captive VMs, fragmented operations, vendor lock-in

RED HAT® SERVICES BRIDGE THE GAP

- Proven methodologies • Critical skills

Flexible, open hybrid cloud architecture and operations

Reduce Cost

Streamline operations

Accelerate processes

Migrate virtual machines (VMs)

Evolve architecture

THE VALUE OF RED HAT SOLUTIONS

Business

- Innovate faster, achieve greater agility, and accelerate time-to-market with fast, responsive automation
- Depend on standardized, automated systems delivered with open standards, validated components, and the safety net of enterprise support
- Reduce costs and avoid vendor lock-in by moving toward a modern, open hybrid cloud

Architect

- Eliminate proprietary dependencies without compromising performance or scale
- Build management and virtualization for robust, flexible computing infrastructures
- Mitigate migration risk with a proven framework and automation
- Gain portability and flexibility with an integrated, open source product portfolio

Operations

- Accelerate response and accuracy by moving from manual to automated systems delivery
- Streamline and simplify operations with unified virtualization platform management
- Accelerate migrations and reduce risk with proven methodology, automation, and tooling
- Develop and apply portable skills across VMs, cloud, and container infrastructures

INFRASTRUCTURE MIGRATION

MIGRATE FROM EXPENSIVE, PROPRIETARY SYSTEMS TO OPEN HYBRID CLOUD

Red Hat Consulting's infrastructure migration solution addresses your most pressing business challenges and opportunities.

ADOPT OPEN VIRTUALIZATION

Standardize and evolve enterprise virtualization and adopt open standards to increase flexibility and growth.

UNIFY AND EVOLVE SYSTEMS MANAGEMENT

Transform operations with streamlined, role-based control and system-wide insights across physical, virtual, and cloud platforms.

ORCHESTRATE MANAGEMENT FUNCTIONS

Provide policy-driven provisioning, synchronize workflows, detect and alert anomalies, and evaluate and remediate drift.

INFRASTRUCTURE MIGRATION PILOT

Assess, define, and automate policy-based VM migrations at scale to benefit from open standards virtualization.

AUTOMATE PROVISIONING

Standardize system specification and provisioning to eliminate one-off systems and establish consistency.

AUTOMATE I.T. WORKFLOWS

Create an effective framework for workflow automation and establish guidance to make operations more repeatable, predictable, and scalable.

MANAGE COMPLIANCE AND EFFICIENCY

Define policies, monitor quotas and events, initiate alerts and remediation, and report utilization costs.

GET STARTED WITH RED HAT CONSULTING

Red Hat Consulting considers not just the technology, but the people and processes in a customer's organization, helping them deliver value faster and focus on tomorrow's challenges. During a Red Hat Consulting engagement, customer teams are trained on the technology while adopting and applying the methods and skills needed to sustain success into the future, after the engagement is over.

EXPLORE

Review opportunities and capture infrastructure requirements, processes, workloads, and environment details of existing infrastructure

ESTABLISH

Build a pilot virtualization infrastructure, standardize VM operations and monitoring, then migrate representative VMs

EXPAND

Deploy production environments, refine migration models, unify operations across virtualization stacks, and iterate migrations at scale
