# DEMO - SCENARIO

- Implement a “Issue Reporting App”
- Report issues/damages on infrastructure and equipment
- Use mobile capabilities - Location, Photo and Barcode capture capabilities
- Should be cross platform - iOS and Android

....and by the way - this must be implemented and provisioned to a device in **15 minutes!!!**...

# SUMMARY

## KEY TAKEAWAYS:

- **One** platform that manages all your mobile projects - gives control, structure and security
- Easy to get started
- Enables rapid application development
- Immediate digitalisation
- Huge business benefits
- Low cost

# WHAT'S NEXT?

## Learn how mobile is challenging traditional IT

### Mobile strategy

Mobile strategy, like mobile apps, is not a one-and-done exercise and needs to be reviewed as the market evolves.

Our e-book, "10 pillars to a winning mobile strategy," reflects our most recent thoughts on mobility strategy.
