

What does it take to achieve digital transformation?

Fujitsu PRIMEFLEX and Red Hat® OpenStack® Platform

The strategy for many CIOs:

- Cloud first
- Flexible open technology platforms

By 2019, 30% of organizations that are due to refresh their integrated infrastructure system will shift to alternatives, such as reference architecture and HCIS offerings.²

What's the wish list for the on-premises part of your infrastructure?

Wishlist

↓

Hyper-converged infrastructure is the answer.

Integrated simple infrastructure

Dynamic assignment of resources

Open technology platforms
with flexible software layer to run a variety of workloads

Easy scalability
assignment of resources

Ready for modern development paradigms

But many CIOs are reluctant to commit to open source...

- Limited budget**
- No best practice established**
- Lack of key stakeholder investment**
- No safe option available**
- Legacy infrastructure**

Fujitsu and Red Hat make sure your open source cloud infrastructure works for your business.

Market leader in open source

Ready-to-run integrated systems including servers, storage and software

Hyper-converged Infrastructure

- Pre-validated
- Pre-integrated
- High security
- Enterprise-class reliability

Visible to you: ease, speed and simplicity

Digital Transformation Platform Demo

We get all your stakeholders around the table to craft your individual solution.
