CHALLENGE

- Upgrade IT infrastructure to support expected growth of 100% in three years
- Gain reliable disaster recovery to support 24/7 infrastructure operation, including faster recovery and automatic switchover
- Replace outdated XenServer platform

SOLUTION

- Migrated to Red Hat Enterprise Virtualization to gain key technical features—such as automated disaster recovery—and expert support
- Engaged Red Hat Consulting to plan an effective, highly available disaster recovery platform

BENEFITS

- Gained ability to add 50% more virtual machines (VMs) in a six-month period without needing additional investment in physical hosts
- Streamlined management of its virtualization infrastructure
- Achieved a predictable, consistent recovery time in contingency testing
- Achieved full automation of the recovery process, resulting in accelerated switchover, reduced risk from manual intervention, and 50% faster recovery time

“Without Red Hat Enterprise Virtualization, we would not have been capable of managing the number of servers we projected. We chose Red Hat because of our long-standing, trust-based relationship and the satisfactory results we’ve achieved.”

PAULO DUTRA
DATA PROCESSING CENTER MANAGER, CAJA DE VALORES
