

# SECURITY PROTECTION. THE RED HAT WAY.

## Red Hat Product Security Risk Report: 2016

### WE DON'T BELIEVE THE HYPE.

A vulnerability may get a name, a logo, or press attention, but that doesn't mean it poses greater risk. Red Hat tells you which branded vulnerabilities matter and which do not.

#### BRANDED HIGH RISK

httproxy

httproxy

Dirty Cow

ImageTragick  
CVE-2016-3714

#### BRANDED LOW RISK

DROWN

SWEET32

Badlock

mAlert  
OpenSSL DoS

### WE FIX THE ISSUES THAT MATTER—FAST

# 100%

of Red Hat Enterprise Linux critical issues had updates the same or next day after public knowledge.

### WE SEEK OUT VULNERABILITIES

Red Hat employees find 11% of the issues we fix.

### WE REDUCE RISK WITH TRANSPARENCY

Keeping issues private increases their value to attackers. In 2016, the median time issues were private before being made public was just **seven days**, a **six-day decrease from 2015**.

#### ! MEDIAN EMBARGO

7  
DAYS
