

The benefits of switching to Red Hat Virtualization

Based on an independent study by Forrester Consulting

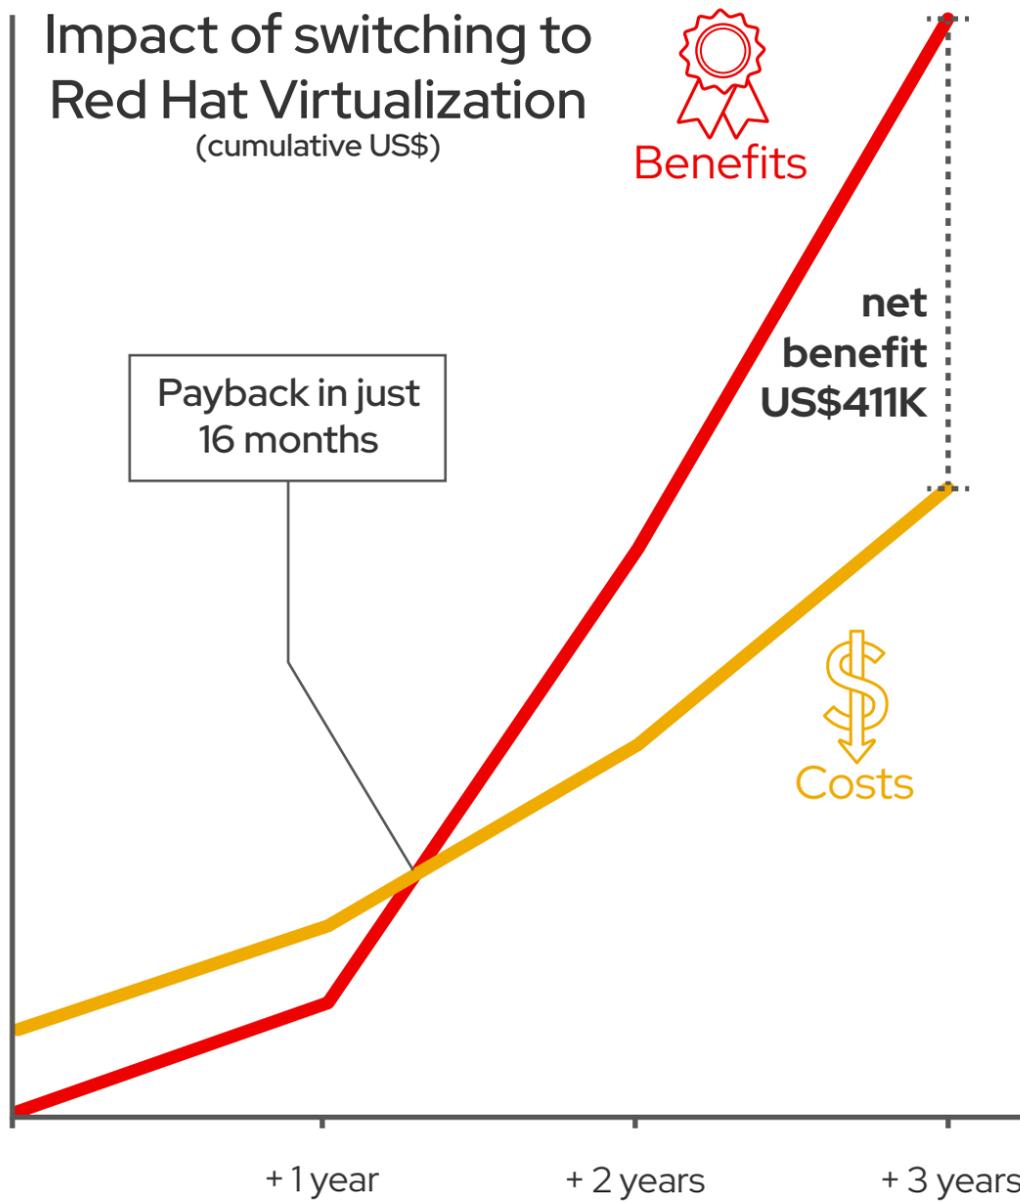

How much could your organization benefit from switching to Red Hat® Virtualization? Forrester Consulting interviewed executives from a large financial services company that had done just that to understand the effect on the business and calculate the Total Economic Impact™.

Freed from the upfront costs and ongoing licenses of its proprietary virtualization solution, the company was able to triple the number of virtual machines (VMs) cost-effectively, helping IT provide the service the business needed to innovate and expand.

71% return on investment (ROI)

The company saw US\$411K net benefit over the first three years—an ROI of 71%.

US\$486K in CapEx savings

Red Hat Virtualization is based on a subscription model with predictable monthly fees, so no more upfront license or annual maintenance costs.

US\$495K in OpEx savings

Red Hat Virtualization handles the maintenance of your virtualization solution and comes with its own management tool as standard.

200 hours

Red Hat Virtualization cut the number of incidents, saving the company 200 hours of development time per year.

3x growth

The flexibility of Red Hat Virtualization helped the company more than triple its VMs—from 300 to 950.

US\$1M total benefits

Savings on CapEx, OpEx and development, and a reduction in incidents, delivered total benefits of US\$995K.

With Red Hat Virtualization, we are now only paying subscriptions and save on CapEx, but we also save on OpEx.

IT director, large financial services company

To find out more about Red Hat Virtualization and its benefits, read the full study from Forrester Consulting.

Financial impact estimates are indicated as three-year, risk-adjusted present values (PV).
