

YOUR GUIDE TO I.T. SECURITY AND OPEN SOURCE

WE'RE SPENDING MORE ON SECURITY

"Spending on IT security is poised to grow tenfold in ten years. Every organization from the largest oil and gas refiner, to the smallest bank has underspent on security."

RICHARD STIENNON, FORBES CONTRIBUTOR

WHAT CIOS ARE SAYING ABOUT RED HAT SECURITY

FICO

"I worry about the same things that others living in a cloud model worry about. I worry about resiliency, reliability, the ability to deliver value to customers. Red Hat helps us with all of those."

PAYPROS

"The security, performance, and throughput we get from Red Hat® Enterprise Linux® result in a shared experience all the way down our value chain."

AMPERSAND

"The main challenge was to find a solution to accommodate the needs of our customers in terms of security and performance, while providing an unparalleled return on investment. Couple these requirements with our need for world-class, enterprise support, and Red Hat led the pack."

WHY OPEN SOURCE SOFTWARE VS. PROPRIETARY SOFTWARE?

ZACK SAMOCHA
SENIOR DIRECTOR OF
PRODUCTS, COVERITY

"Open source software projects that leverage development testing continue to increase the quality of their software, such that they have raised the bar for the entire industry."

OPEN SOURCE = QUICK RESPONSE TO BUGS LIKE HEARTBLEED

"Open source software is actually an advantage for security researchers because you can have all kinds of researchers like the ones who found this bug tinkering away at research projects kind of in their spare time and finding holes in it. So it's actually a significant advantage to have open source software."

JORDAN ROBERTSON FROM BLOOMBERG BUSINESSWEEK

WHO TRUSTS RED HAT SOFTWARE?

50% of the world's trading volume is powered by Red Hat products and solutions.

Citation: Red Hat client data, 2013

100% of Fortune 500 companies in the airlines, commercial banks, financial data services, healthcare (insurance and managed services), and telecom industries are Red Hat customers.
