

SIMPLIFYING VIRTUALIZATION WHILE INNOVATING WITH RED HAT

HEADQUARTERS:
Hoffman Estates, Illinois

"Serving Sears members is our top priority, and one way we do that is by keeping our online services at the forefront of innovation, ensuring that our platform is both highly scalable and functional. Transitioning to Red Hat Enterprise Virtualization enabled us to maintain that edge, while giving us the opportunity to replace our proprietary solution without sacrificing either the speed or efficiency of our operation."

- YIANNI GEORGAKAS, DIRECTOR OF SYSTEMS, ENGINEERING-ECOMMERCE, SEARS

HEADQUARTERS:
Harmondsworth, England

"We use Red Hat Enterprise Virtualization to create our own cloud so that our developers can use it to build their own virtual machines and hence build and control environments as they wish. We have used Red Hat solutions in various parts of our business for ten years, and we are pleased to continue our long-standing relationship by deploying Red Hat Enterprise Virtualization. As developers need to create and delete environments quickly, a highly scalable solution is critical for us and this advantage then means that we don't need to over-commit on our IT plans."

- RICHARD DAWSON, UNIX AND LINUX INFRASTRUCTURE CONSULTANT, BRITISH AIRWAYS

HEADQUARTERS:
Madrid, Spain

"We chose Red Hat for our internal cloud roll-out because it's the only multi-platform cloud solution currently in the market which is genuinely multi-vendor. Red Hat offers us a cloud solution that can be integrated with our previous infrastructure, without the need to demount what we already had in place to continue moving forward."

- SARA ISABEL RUBIO, HEAD OF PLATFORMS TECHNOLOGY AND PLANNING, TELEFÓNICA GLOBAL SOLUTIONS

HEADQUARTERS:
London, England

"Red Hat Enterprise Virtualization has equipped us with a reliable plan should a catastrophic failure occur in either of our U.S. locations. We are now able to take live snapshots of our virtual machines and synchronise those backup files to each data centre. When needed, the virtual machine can easily be rebuilt using the most recent backup and all services will be up and running within hours from the alternate location."

- SIMON CHIU, SENIOR SYSTEMS ENGINEER, BONHAMS, SAN FRANCISCO
