

PROACTIVE INFRASTRUCTURE RISK MANAGEMENT WITH RED HAT INSIGHTS

OVERVIEW

Businesses are under pressure to increase efficiency, agility, and innovation. However, as technical environments become more complex, organizations must often delay progress toward strategic goals to focus on troubleshooting and resolving critical IT issues. To gain insight and address risks before they affect business operations, organizations can perform continuous monitoring and analysis of their evolving IT infrastructure.

Red Hat® Insights provides Software-as-a-Service (SaaS)-based operations analytics on Red Hat Enterprise Linux®, OpenStack®, containers, and virtualized environments. It analyzes IT infrastructure against Red Hat's constantly expanding knowledgebase to provide a real-time assessment of risks related to performance, availability, stability, and security. After a thorough analysis, any critical issues requiring attention are clearly displayed and prioritized by severity in an easy-to-navigate user interface.

Meet high IT performance and security demands across traditional and cloud workloads. Gain enhanced visibility into IT environments.

Avoid disruption and optimize performance with trusted guidance from Red Hat, a leader in open source.
