Abhinav Joshi

personal

- Traveller, Raleigh is home, wanted to be an Architect, ended up in Chemicals & then IT.

professional - 18+ yrs

-  **Red Hat**
- VMware, NetApp, Cisco, GSIs

blended

skype/twitter/github/irc, life:

<https://www.linkedin.com/in/abhinavjoshi/>

Keith Basil

personal

- Virginia hare scrambler, plays chess..

professional

-  **Red Hat**
- Cloudscaling, Time Warner Cable, FederalCloud.com, Cisco and a couple of startups

blended

skype/twitter/github/irc/.com, life: noslzzp

AGENDA

- 1. Business and IT Goals and Challenges
- 2. Open Hybrid Cloud
- 3. Kubernetes-native infrastructure
 - a. Concept
 - b. Use Cases
 - c. Value and differentiation
- 4. Summary

BUSINESS GOALS

INNOVATE FASTER

ACHIEVE MISSION OBJECTIVES

**IMPROVE CUSTOMER
SATISFACTION**

GROW REVENUE

REDUCE COSTS

PROTECT THE REPUTATION

I.T. AND APP DEV GOALS

DELIVER INNOVATIVE
SOFTWARE APPS

“CLOUD-LIKE”
AGILITY AND SIMPLICITY,
ANYWHERE

SECURITY & COMPLIANCE

REDUCE TCO

ON-PREMISE I.T. AND APP DEV CHALLENGES

SLOW AND
REACTIVE

HIGH
COSTS

COMPLEX
LEGACY
OPERATIONS

REACTIVE
SECURITY

PEOPLE &
PROCESS

HOW DO I.T. AND DEVELOPERS MOVE FORWARD?

Build a DevOps
culture

Move to
cloud-native app
dev

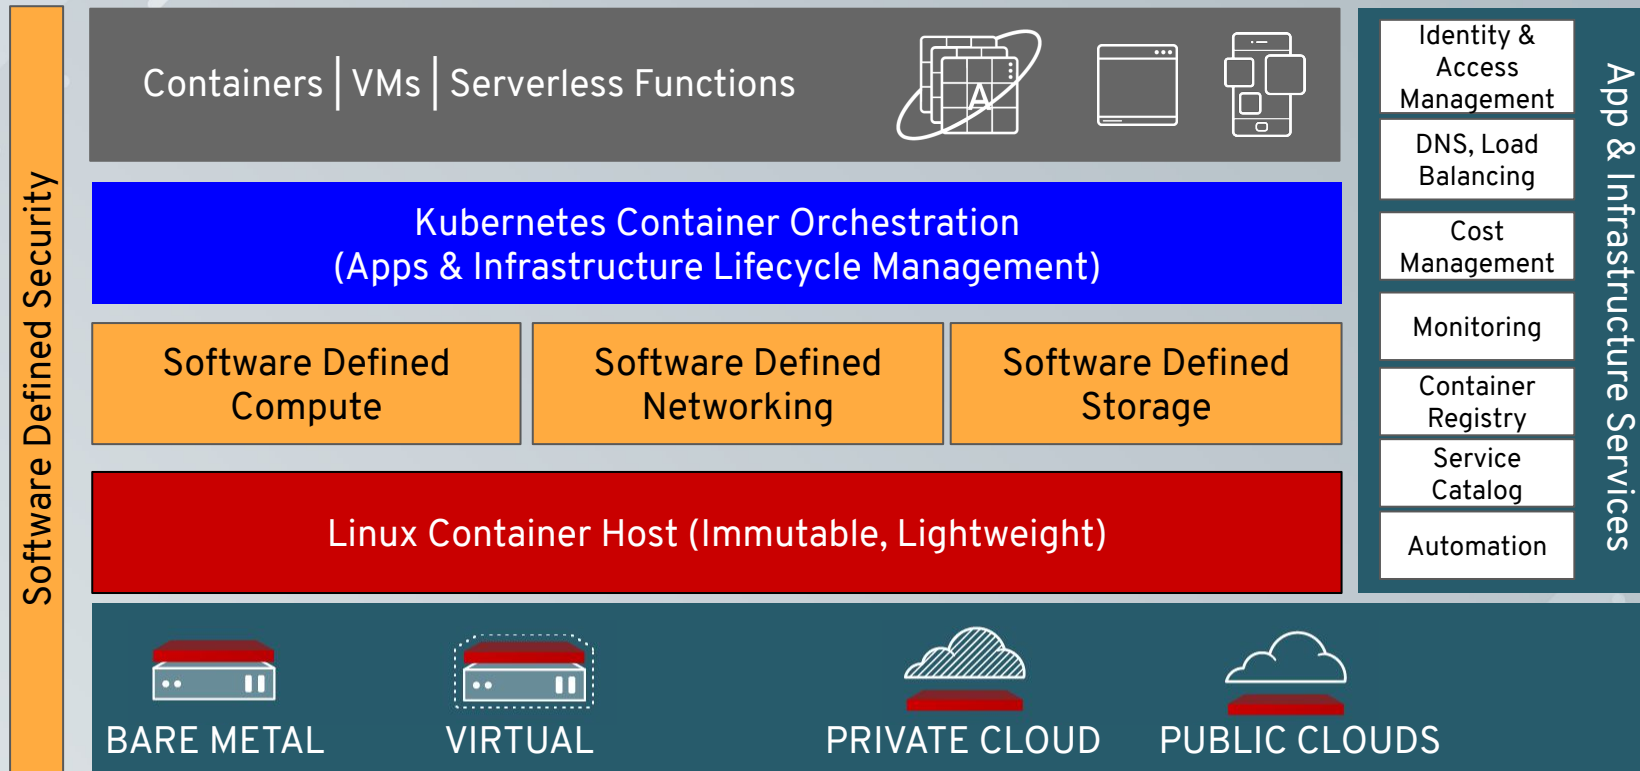

Operationalize a
secure,
hybrid cloud

KUBERNETES POWERED OPEN HYBRID CLOUD

Gives developers the freedom to innovate faster across on-premise and public clouds

FUNCTIONAL ARCHITECTURE

RED HAT MAKES OPEN HYBRID CLOUD REAL

Containers | VMs | Serverless Functions

Red Hat
OpenShift 4

Red Hat
OpenShift
Container Storage

Red Hat
Enterprise Linux
CoreOS

BARE METAL

VIRTUAL

PRIVATE CLOUD

PUBLIC CLOUDS

TOP BRANDS ARE REALIZING BUSINESS VALUE WITH RED HAT OPEN HYBRID CLOUD

OpenShift on AWS,
& Private Cloud

Increased application
development throughput by a
factor of

10x

from 20 to 200 changes a day

The Hilton logo, consisting of the word "Hilton" in a white, serif font, enclosed within a black rectangular border.

OpenShift on AWS

Improved

**Time to
Market**

by speeding
development time from

**months to
days**

OpenShift on AWS, Azure, &
Private Cloud

Launched a new cloud platform in

10 days

and cut development time for new
services and APIs by

50%

CUSTOMER FEEDBACK...

- Apps and data ON-PREMISE for various reasons (e.g. compliance, performance, etc.)
- Need Containers, Serverless Functions, and VMs
- Don't want to pay for the expensive hypervisor tax & the associated complexity

CUSTOMER FEEDBACK...

- Cloud Agility & Simplicity for both Infrastructure & Apps
- Granular security

KUBERNETES-NATIVE INFRASTRUCTURE CONCEPT IS THE ANSWER...

Containers | VMs | Serverless Functions

Red Hat
OpenShift 4

Red Hat
OpenShift
Container Storage

Red Hat
Enterprise Linux
CoreOS

BARE METAL

VIRTUAL

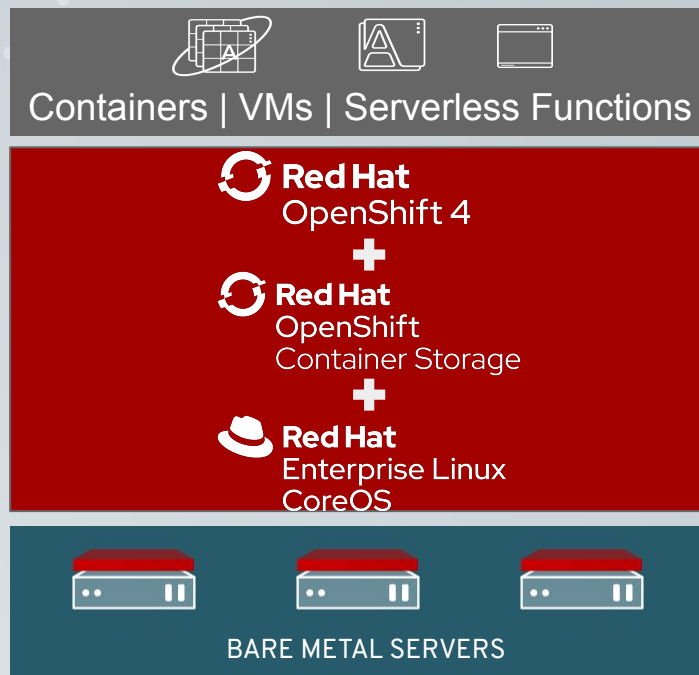

PRIVATE CLOUD

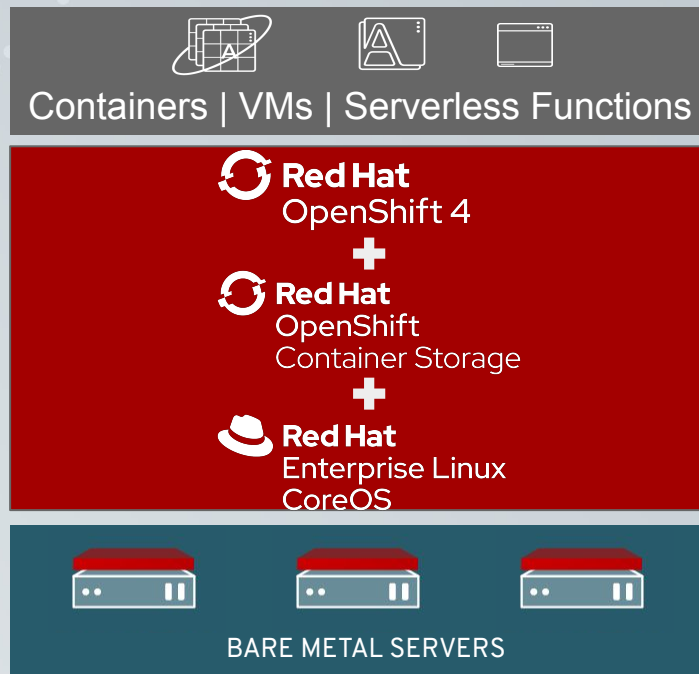

PUBLIC CLOUDS

KUBERNETES-NATIVE INFRASTRUCTURE CONCEPT OVERVIEW

- Enterprise open source software stack on opinionated bare metal configurations
- Delivered through OpenShift
- Kubernetes as the single control hub for apps and infrastructure lifecycle management:
 - Containers, functions, and VMs
 - Compute, network, storage, etc.

KUBERNETES-NATIVE INFRASTRUCTURE CONCEPT OVERVIEW

- Kubernetes Operators to automate the Day 1-2 ops for both apps & infrastructure
- RHEL CoreOS as the immutable, lightweight OS with “over the air updates”

OPEN SOURCE TECHNOLOGIES IN USE

Kubernetes Operators
Framework

Rook

KubeVirt

kubernetes

ceph

INITIAL TARGET USE CASES

Developer Cloud
(Web & mobile app dev)

Latency sensitive
applications

Sample Target Apps

Containers

VMs

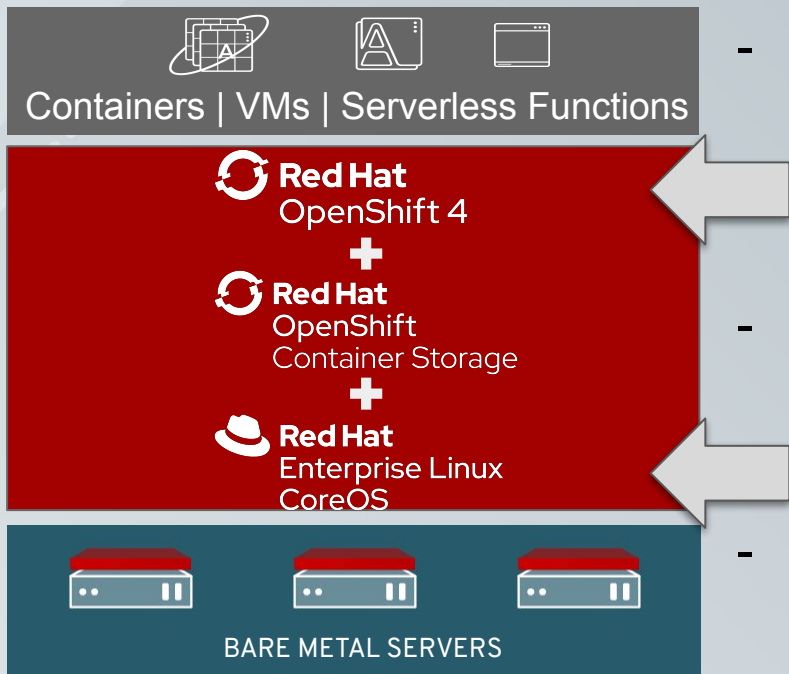

A COMPLIANCE DRIVEN APPROACH

All trademarks, service marks, trade names, trade dress, product names and logos appearing on the site are the property of their respective owners.

Security Approaches and Influences in KNI

- Compliance as code

- Compliance and remediation as a software process
- Essential for immutable system and container images

- Security Automation

- Required to maintain security in complex architectures

- Zero Trust philosophies

- Enables policy driven security contexts for devices, identities and applications

Kubernetes-native infrastructure
concept can help operationalize
the Open Hybrid Cloud vision,
and enable business innovation.

BENEFITS TO I.T. AND APP DEV

Simplify, accelerate,
and achieve cost
efficiency with
IT operations

Faster time to value
by accelerating
application
development

Enable “cloud-like”
experience,
on-premise

Security & Compliance

THE DIFFERENTIATION...

Accelerates
operationalizing
the Hybrid and
Multi Cloud
Strategy

Agility & lower
TCO as a result
of simplified
architecture and
operating model
(no vTax!)

Attract and
retain talent to
work on cutting
edge technology

WANT TO DIVE DEEPER?

3:15PM - 4PM; May 9th

“A Kubernetes-native infrastructure deep dive”

SUMMARY

IT & App Dev agility & simplicity is key to business innovation

Kubernetes-native infrastructure can help achieve agility, simplicity, and attract talent, while ensuring security and cost efficiency

Please contact your Red Hat sales team so we can have a focused discussion on your needs
