BIRDS OF A FEATHER

How this works...

Opinion:

You all are nuts for even coming to this BoF
CAN YOU DEFINE A MICROSERVICE?

Pitfall #1

Opinion:

Sceptical developers define small SOA services as microservices
DATA, DATA, AND MICROSERVICES

Pitfall #2

Opinion:

Developers be warned - You can’t handle the distributed data store (falling back to tightly coupled SOA with shared data store)
MICROSERVICES < MONOLITHS

Pitfall #3

Opinion:
Fast moving monoliths are better than microservices
DECOUPLED APPS OVERRATED

Pitfall #4

Opinion:

Distributed computing is unnecessarily complex, overrated, and full of fallacies*

YOUR ORGANIZATION CAN’T HANDLE MICROSERVICES

Pitfall #5

Opinion:

Traditional siloed organizations coulda-shoulda-woulda transformed before tackling microservices
Opinion:
Cost isn’t the driving factor for using microservices
