KBTG

**Industry**

Financial services

**Software**

Red Hat® Enterprise Linux®

Red Hat JBoss® Enterprise  
Application PlatformRed Hat OpenShift®  
Container Platform

Red Hat AMQ

Red Hat Training

Kasikornbank (KBank) is among the top five largest banks in Thailand, as measured by total assets, loans, and deposits. Over the next five years, Kasikorn Business-Technology Group (KBTG) plans to focus on the Internet of Things, user experience/user interface (UX/UI) design, application programming interfaces (APIs), advanced mobile programming, blockchain technology, and machine learning.

**Challenge**

To support the growth of its user base and bring new features and services to market faster, KBTG needed to overhaul its existing IT environment.

**Solution**

KBTG decided to migrate from its existing platform to Red Hat Enterprise Linux and Red Hat JBoss Enterprise Application Platform (EAP). To help its teams gain experience with its new Red Hat application environment, KBTG took Red Hat Training courses both on site and online.

**Benefits**

- Faster time to market for new banking services
- Improved transaction speed and scales
- Simplified management for better operational insight

*“While this was new technology to us, online and classroom training provided by Red Hat Training helped us build our skills so we could handle much of the migration ourselves.”*

**Thanussak Thanyasiri**

Senior Delivery Manager, Kasikorn Business-Technology Group (KBTG)
