

The Business Value of Red Hat Satellite

Red Hat Satellite is a system management solution designed to help customers deploy and manage their Red Hat Enterprise Linux infrastructure in all environments. Red Hat Satellite customers are realizing significant value by leveraging the platform to improve their overall operational cost, application performance, and staff productivity. IDC calculates that these efficiencies enabled organizations to achieve **\$7.67 million per year** in benefits, which resulted in a **three-year ROI of 447%**.

KEY RESULTS

management

CUSTOMER QUOTE (FINANCIAL SERVICES ORGANIZATION):

“Red Hat Satellite provides my organization with centralized management and automation. The automation of provisioning, configuration management, and patch updating are significant benefits. We also really appreciate the monitoring and alerting features provided by Satellite to enhance our security capabilities. It is very integrated with the environment; it provides the scalability we require.”
