Red Hat Certified Cloud and Service Provider program

Rödl & Partner is a globally active company that offers services ranging from legal advice, tax advice, tax declaration, and auditing to business and IT consultancy as well as IT operations. As a Managed Service Provider, Rödl IT Operation GmbH specializes in the operation of SAP and other business-critical Enterprise Resource Planning (ERP) systems for customers in the German SME sector.

Challenge

Rödl IT Operation GmbH constantly strives for standardization and automation across its entire environment. In this context, they investigated how to achieve greater flexibility and efficiency in the Linux-based operating environment through the use of Red Hat products and features.

Solution

Rödl IT Operation GmbH uses Red Hat Satellite and Red Hat Ansible Automation Platform to reduce maintenance downtime and shorten patch cycles. Together, both solutions offer a higher level of standardization and automation.

During an on-site workshop, Red Hat demonstrated how the introduction of new Linux servers can be accelerated and standardized at the same time using Red Hat Automation Solutions for SAP. The operating systems are now managed by Red Hat Satellite.

Benefits

- Reduced downtime
- Optimized IT performance
- Accelerated deployment and availability of Linux-based systems
- Aligned strategic direction with developments on the Red Hat roadmap
- Strengthened supplier relationships on their SAP journey

“Red Hat has supported our business with exceptional stability and reliability for 20 years. Such reliability provides business continuity and leads to better customer satisfaction results.”

Klaus Lehnen

Team Leader Technical Competence Center SAP Technology,
