

# STUDENTS AT UFCG BUILD OPEN SOURCE SKILLS WITH RED HAT ACADEMY

CUSTOMER SUCCESS SNAPSHOT

## HIGHER EDUCATION

### SOFTWARE AND SERVICES

Red Hat® Academy

Red Hat Training and Certification

With 18,000 students, Universidade Federal de Campina Grande (UFCG) is one of Brazil's leading technology universities.

### CHALLENGE

To ensure its technology students are leaving university with the necessary practical experience to build careers, UFCG sought to expand its contributions to OpenStack® and other open source communities and offer new courses and certifications for students located in a remote area.

### SOLUTION

UFCG and Red Hat engaged Red Hat Academy, a program for educational organizations to deliver Red Hat Training and Certification to students. As part of this partnership, UFCG and Red Hat are working together to set up a dedicated lab for up to 100 students to learn about Linux®, Red Hat solutions, and other in-demand technologies. This new lab and course curriculum will be available for the 2019 school year.

### BENEFITS

- Provides hands-on, practical experience with industry-standard tools and real-world IT scenarios to help students learn in structured courses and independently
- Offers exam discount for Red Hat Certified System Administrator (RHCSA®) and other certifications
- Enhances UFCG's reputation as a technology education leader, nationally and worldwide

*"It's really important to teach students how to code and prepare them for the real world. Doing open source work in your university years enables you to become a much better engineer. Red Hat Academy is a great way to get those skills and prepare students to achieve job opportunities."*

ANDREY BRITO  
PROFESSOR AND I.T. DIRECTOR, COMPUTER SCIENCE DEPARTMENT, UFCG
