

Red Hat Academy

Institution tiering program

“My journey with Red Hat boosted when I got the coveted internship opportunity for the Cloud Site Reliability Engineer position and since then it was never looking back . . . I am thankful to Red Hat Academy for helping me gauge my knowledge and expand my skill sets. It has helped me both academically as well as professionally.”

Nikunj Doshi

former Red Hat OpenShift Container Platform intern, Northeastern University

“I have found the Red Hat Academy Program material to cater to my career interests and in helping me acquire applicable industry skills.

Bridge the gap between education and industry

Red Hat® Academy helps educational institutions keep pace with the demands in the IT industry. The Linux® platform, application services, and cloud technologies curriculum involves hands-on instruction built on the expertise of Red Hat development, support, and field consulting teams. Rather than learning theoretical skills, students learn practical skills based on use cases from thousands of enterprise implementations.

Features and benefits

Red Hat Academy tiering program offers benefits that further expand the program at your institution and in the educational community. Each level of tiers—Ready, Advanced, and Premier—has benefits based on the institution’s dedication to Red Hat Academy. The program rewards high engagement, consumption, and overall standing.

Program benefits	Ready	Advanced	Premier

The hands-on labs allow me to retain information more effectively and develop skills for completing real-world tasks that can be directly applied in a real work environment. In my journey of earning the RHCSA®, I have gained greater confidence in my Linux skills that were unfortunately not offered or advertised at our university before this program began. It has also made me become more curious and informed about the technologies that are currently used in the industry."

Jonathan Saenz
Texas A&M¹
