## Available for purchase

### By individual

Red Hat Learning Subscriptions are available on a per-user basis for all tiers. Individuals, teams, and small organizations can mix and match tiers as needed to meet their Red Hat Training and Certification goals.

### For the enterprise

Red Hat Learning Subscription Enterprise is a scalable and comprehensive learning solution for organizations seeking ongoing training for a large number of users. The enterprise version of each tier offers significant cost savings for a large number of subscriptions at a single, flat price.

# Rapid skills transformation on Red Hat technologies

## Get on-demand learning

For just-in-time learning across the Red Hat portfolio

24x7 access  
globally

Self-paced  
courses

Cloud-based  
labs

Translated  
content

E-books for  
offline use

Early access  
to content

## Access in-depth, continuously updated content from experts

- 50+ Red Hat Training online courses, including new and updated courses.<sup>1</sup>
- 100+ hours of video classroom course content.<sup>1</sup>

## Verify your skills with Red Hat Technologies

Prepare for Red Hat Certification with content straight from the source and then choose how you want to get certified: via classroom or online.

## Keep pace with change

- Technology is always evolving
- New versions are released
- New products are adopted
- The need for product knowledge changes

## Maximize your Red Hat investment

- According to a recent IDC study, trained development teams are an average of 38% more productive, greatly enabling their ability to drive business success through development of new applications, features, and services.<sup>2</sup>

## Take teams further, faster

"We've erased 10 years of bad development debt with the deployment of Red Hat Ansible and the staff training that enabled it....Previously, our release process took six hours. Now it's down to two hours, all while producing higher quality."<sup>2</sup>

"Red Hat Training [showed] our DevOps team how to automate a repeatable task. They can write one playbook to execute a set of tasks that would have taken hours or days."<sup>2</sup>

"With Red Hat Training it doesn't matter which engineer is engaged on a project. They are all using Ansible for automating tasks, allowing them collectively to be five times as productive."<sup>2</sup>
