Keep pace with change

- ▶ Technology is always evolving
- ▶ New versions are released
- ▶ New products are adopted
- ▶ The need for product knowledge changes

Maximize your Red Hat investment

- ▶ According to a recent IDC study, trained development teams are an average of 38% more productive, greatly enabling their ability to drive business success through development of new applications, features, and services.²

Take teams further, faster

"We've erased 10 years of bad development debt with the deployment of Red Hat Ansible and the staff training that enabled it....Previously, our release process took six hours. Now it's down to two hours, all while producing higher quality."²

"Red Hat Training [showed] our DevOps team how to automate a repeatable task. They can write one playbook to execute a set of tasks that would have taken hours or days."²

"With Red Hat Training it doesn't matter which engineer is engaged on a project. They are all using Ansible for automating tasks, allowing them collectively to be five times as productive."²
