

The impact of Red Hat Ansible Automation Platform training

Increase productivity and accelerate application time to market

Scale people, processes, and infrastructure with Red Hat® Ansible® Automation Platform training.

IDC reports their findings.¹

Improve speed and agility

Red Hat Training courses improved job readiness.

With skills gained from training, staff were able to faster deploy new IT resources.

- Physical servers
- Virtual machines
- Containers
- Storage

DevOps productivity

With Red Hat training it doesn't matter which engineer is engaged on a project. They are all using Ansible for automating tasks, allowing them collectively to be **five times as productive**. This was not possible previously. As a result, they've definitely picked up the pace of productivity.

—IDC study participant
